Your 30-Day Mastery report

Fictional sample | Asha | Operations Associate

Your progress

12 interviews and four milestone consultations completed in this sample. You moved from describing the team’s work to explaining your own decisions and checks.

Day 1 to Day 30

Before: “I helped the team fix the report.” After: “I traced the missing rows to the import, corrected the mapping with a teammate and checked the result against the source.”

Video feedback

You glanced down at your notes while giving the result. Put your notes near the camera and pause before your final line.

Your next interview plan

Revise three STAR stories: project ownership, a difficult decision and teamwork. Rehearse two follow-ups and explain a trade-off in one sentence.

English Communication

Replace “I helped” with the action you took. “I checked the source file against the report.”

Role Competency

Show how you verified the fix. Name the quality check you ran before the demo.

Critical Thinking

Explain why you checked the source before changing the import. Give one alternative you considered.

Interview Performance

Answer the follow-up directly. Add context after you state your contribution.
